INTRODUCTION

Manitoba is about to enter Phase II of its Hazardous Waste Program: system design and site selection. Phase II will officially begin with The Clean Environment Commission report on its hearings. This selective bibliography will provide background references to relevant literature on hazardous waste management in preparation for these meetings.

The citations cover the years 1983 to July 1985 and have been compiled from various on-line data bases, catalogues and a survey of relevant periodical indexing and abstracting tools. As with the previous bibliography, references to specific hazardous wastes and ocean incineration have been omitted.

The documents cited are available through local public or university libraries or from their sources. Many are available from the National Technical Information Services (referred to as NTIS in this bibliography) at 5285 Port Royal Road, Springfield, Virginia, 22161 or phone (707) 557-4763. Check with your local library as to their hours, loan policies and costs for photocopies or interlibrary loans.
